Hueco Basin

This is your opportunity to invest, under most favorable cir-cumstances, in a reasonable development that holds every promise of producing oil in tremendous quantity. It is a co-operative venture with special favors shown to no one and offering an equal opportunity to every investor to share in all profits in proportion to the amount invested. There is no promotion stock and there are no profils or returns to be made by any one through participation in the company, except as the development is a success. The vast holding of the company mean that success will bring perfectly enormous returns to the stockholders.

Holdings

The holdings of the company cover the all and gas rights on twenty-five thousand acres of land in the Hueco Bash. Our leading were chosen by Er. S. H. Wearell, Bean of the Interesting of Texas School of Hines, and at the time that he made his field trips practically the entire Basin was available. We are on mighty fine structure and have the creum of the field. Mr. H. G. Moss, president of the California Well Brilling Company (It has the contract), says that our holdings cover, in prespect, the best looking field that he sever had the pleasure of seeing. He came here in a skeptical frame of mind, but after a trip in the field he says that it is a proposition without equal. That is a mighty good recommendation coming from a man of twenty-nine years' successful experience in the oil game. These holdings are so large that when we get un oil well we have an oil field and probably

A Billion Dollar Oil Field

The potential value of the holdings of this company can best be appreciated by reading the following clipping taken from a forel proper.

The Greatest Gain From Oil Land in History

Texas & Pacific Company at Ranger Breaks All Established Records.

Dallas Texas May 38.—Three hun-ired millior dollars is the value of 0,000 acres of land within fire miles of Ranger, given to the Texas and Pa-ific Coal company two years ago, provided the company would sink our test wells on it. This is the greatest money-making eat in the history of the Texas oil icid.

eting interests over all the United

tracting interests over all the United States.

When the Texas and Pacific Coal company took over the innd under the agreement, it was just beginning in the oil game. The company is now the Texas and Pacific Coal and Oil company. Many wells have been drilled on the land, proving the territory to be warth the amount stated and, an development continues, its worth will slowly creep to \$1,000,000,000.

Drilling Contract Is Signed

The drilling contract was signed some days uge by the California Well Brilling Company of Los Angeles and Taft, California, and tools and machinery will soon be here. This drilling company is one of the best and is under bond to us to perform the contract as taken. A time limit is set for completion and there will be mighty few excuses affered by us, as we have taken every precupion to avoid troubles.

The successful development of the Bucco Basis would being greater prosperity to El Faso, and more individual riches to its efficens, than could be brought about by may single factor other than oil.

Subscriptions Still Being Received
